

ABSTRACT OF THE DISCLOSURE

1 A battery-powered sewer and drain cleaner comprising a frame, a rotatable drum
mounted on the frame which has a flexible plumber's snake associated therewith, a DC
motor mounted on the frame for driving the drum and a rechargeable battery mounted
5 on the frame for powering the DC motor. A control is connected to the DC motor for
controlling the operation thereof. The use of DC power for the cleaner eliminates the
electrocution hazard associated with AC-driven sewer and drain cleaners and
eliminates the need for an extension cord.
